Offline password manager

Problem → The cloud is fundamentally insecure

«Serious vulnerabilities in all major password managers»

Washington Post - 2019

«LastPass vaults leaked to hackers»

theverge.com - 2022

«After the LastPass hack, can you trust password managers?»

Wall street journal - 2023

Solution → Novel tech that doesn't rely on the cloud

A first of it's kind P2P network that works completely offline. Combined with a distributed database. This allows data to flow directly between devices with **unparalleled security** and convenience, ensuring your information remains **entirely local** without any need of cloud storage

Bluetooth P2P
network

End-to-end encrypted and
works in standby

+

Distributed local
database

Encrypted w/ apples
secure enclave HW chip

=

First of it's kind
innovation

Patentable, platform
agnostic, works in standby

Our novel tech has been **built from the ground up** over the last 3 years

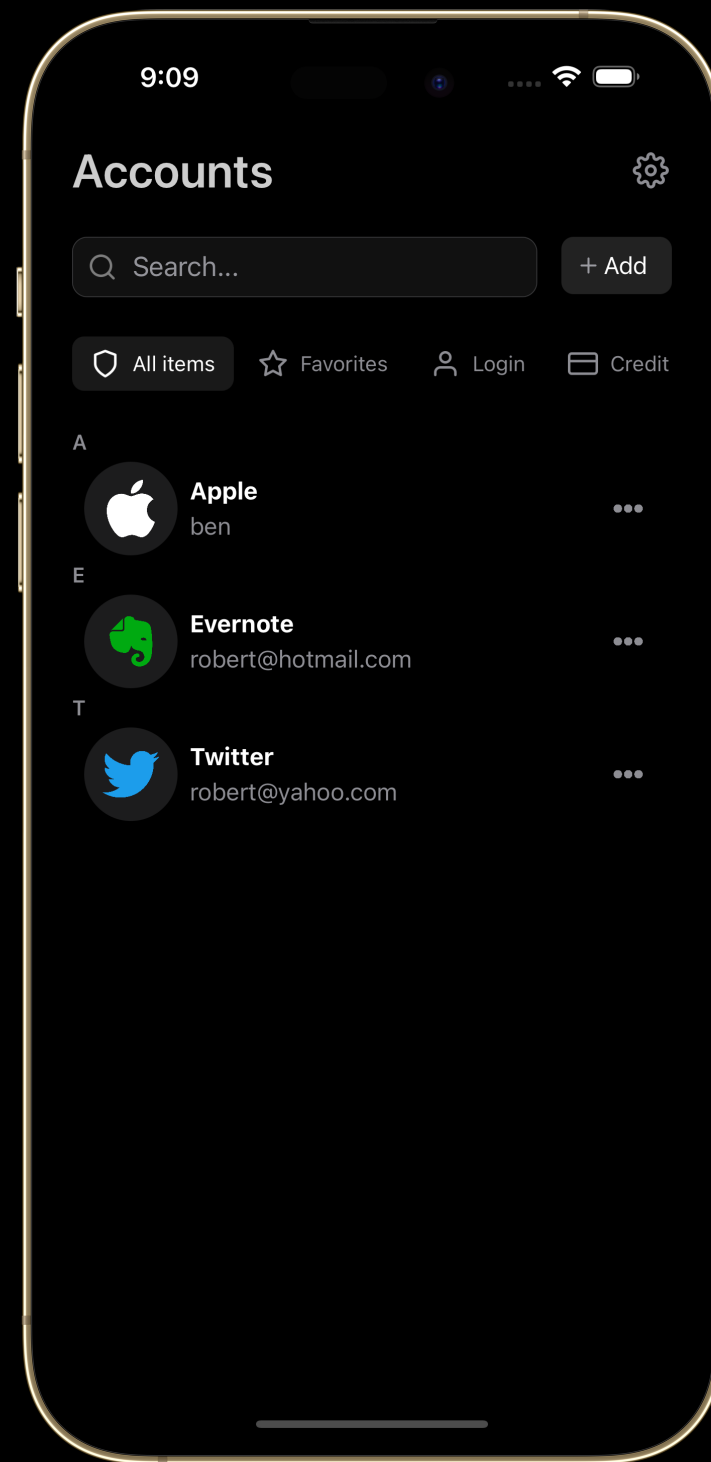

More than 10k hours in R&D, App development, and deployment infrastructure.

Product → A password manager that syncs offline

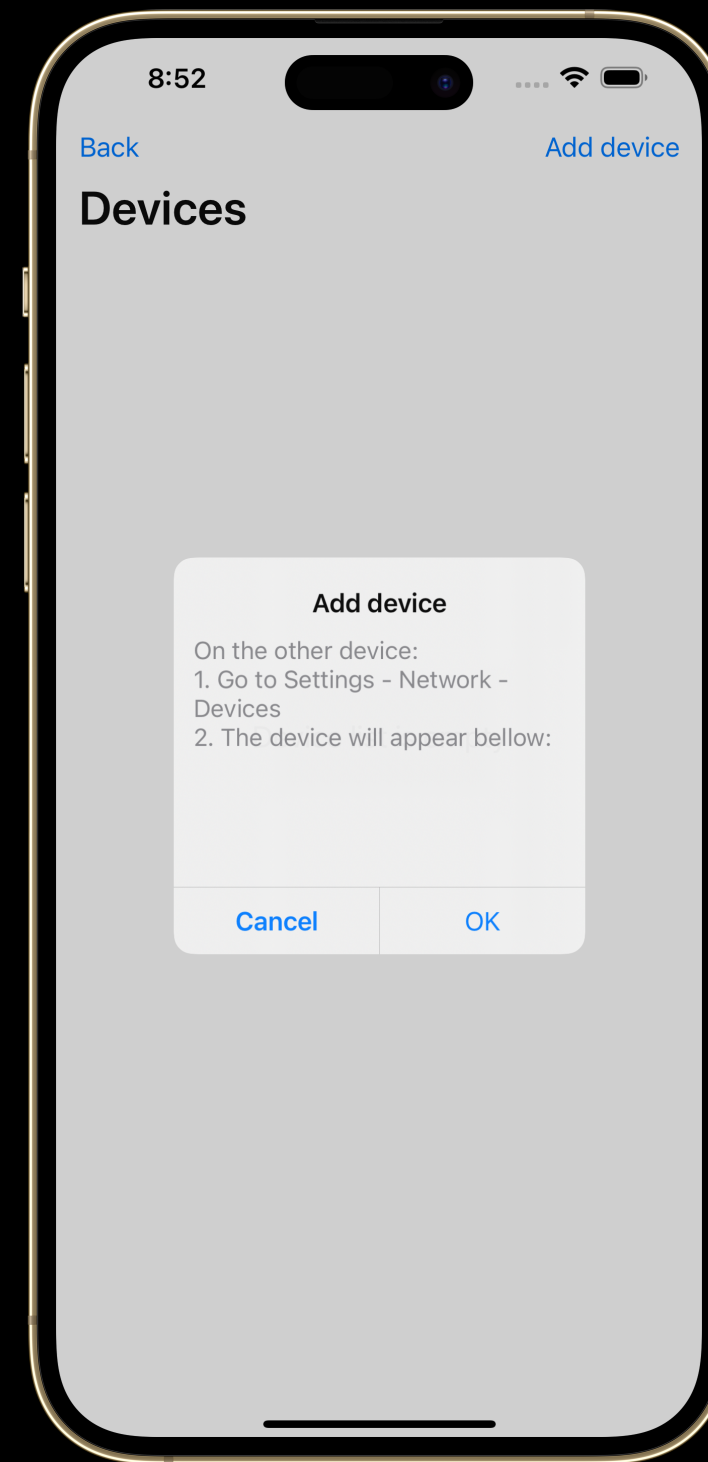

1. Login

Authenticate with FaceID /
TouchID

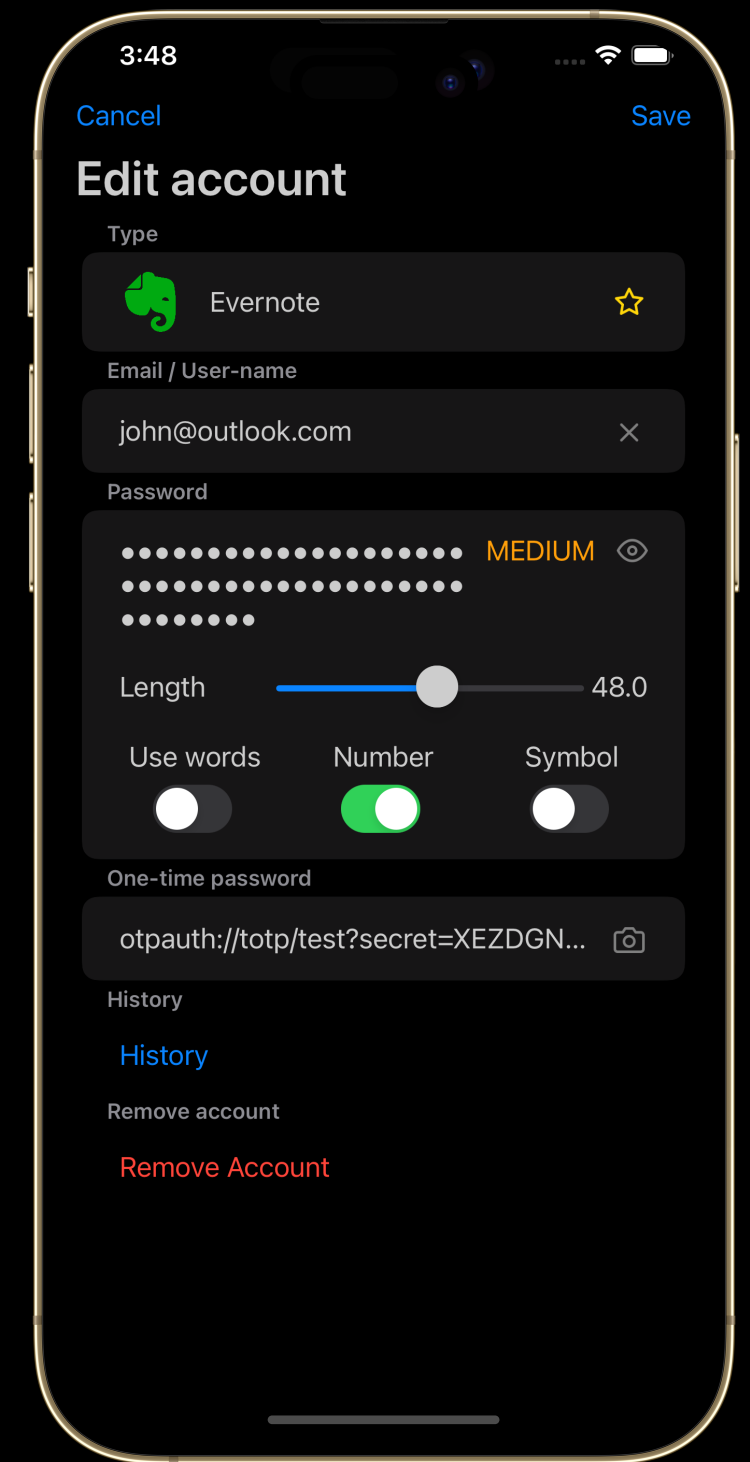

2. Store

All passwords are stored locally
on the devices only

3. Setup

Add other devices you want to
keep synced, like your mac

4. Sync

Changes are auto-synced to all
your devices over local P2P

We support iOS and macOS

Traction → The first 4 weeks on TestFlight

Whats working

Conversion

46% of website visitors download our product

Followers

100+ new followers on produthunt per week

Errors and bugs

14% non critical errors. 0% Lost data

Updates

94% Updates when new releases are available

What we are improving

User churn

Telemetry show high churn, as expected

Downloads

60+ Downloads per week, as expected

Sessions

Usage 3.12min / day
44 interactions

User growth

12% per week. from growth hacking (Still testflight)

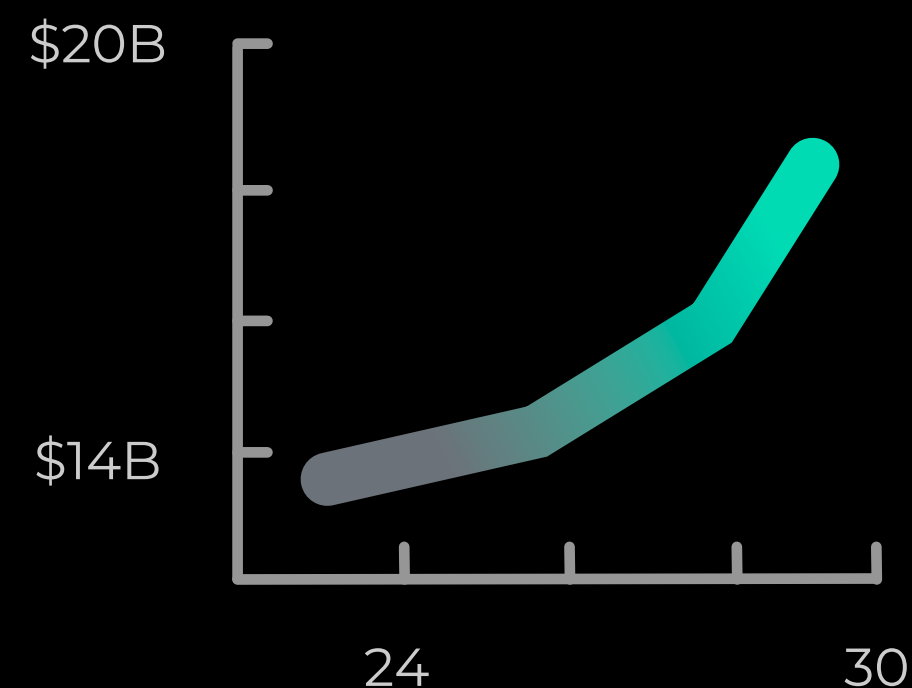

🇺🇸 Usa: 34%, 🇨🇳 China: 40%, Other 26%

Market → Blue ocean opportunity

“Lack of trust and transparency are the main reason for the low adoption of password managers”

Only 5% use a password manager today

\$14B market and growing 20% per year

Source: Research paper "Password Managers - It's all about trust and transparency" (2020), Cardiff University
By being offline we essentially removed the key barrier to adoption. Namely lack of trust in our cloud.

Industry insight → The “PrivSec” vertical is a megatrend

Network and search:

+20%

VPN industry

Yearly revenue growth of 20%
to \$54b 2023

+200%

Tor network

Usage gre 200% to 2M DAU
2019 - 2023

+260%

Duckduckgo

Usage grew 260% from 2019 -
2023

Messaging and utilities:

+300%

Brave browser

DAU grew 300% (to 15.5 million)
from 2020 to 2023

+500%

Protonmail

User growth 500% to 100m
2020 - 2023

+350%

Telegram

MAU grew 350% to 700m
(2018 - 2023)

An alternative to telegram that has better privacy and security is the app: Signal which grew 200% to 80m active users in (2021 - 2023)

User persona → User segmentation into the future

Trailblazers (2023)

“Semi paranoid techies”

Traits: Apple, Crypto, 1password

Pains: Trusting the cloud

Needs: Control, Safety

Early birds (2024)

“Digital citizens”

Traits: Chrome, still uses lastpass

Pains: Privacy worries

Needs: Convenience, privacy

Late adopters (2026)

“Corporate normies”

Traits: Windows, Android

Pains: Complexity

Needs: Simplicity, trust

Team 1.0 → Superstar founders and entourage

Founding team:

André Jørgensen
(CTO)

Tidal, Telia, Anti, Breeel
3k+ stars github
2x Top products producthunt

Linn Elise Bjerkeli
(CEO)

Atea, NorgesGruppen, PA
consulting
Coaching Oda, A&CO

Angel investors:

Jonas Rinde

Cofounder / CEO Nomono, CEO Huddly

Karan Peri (pending)

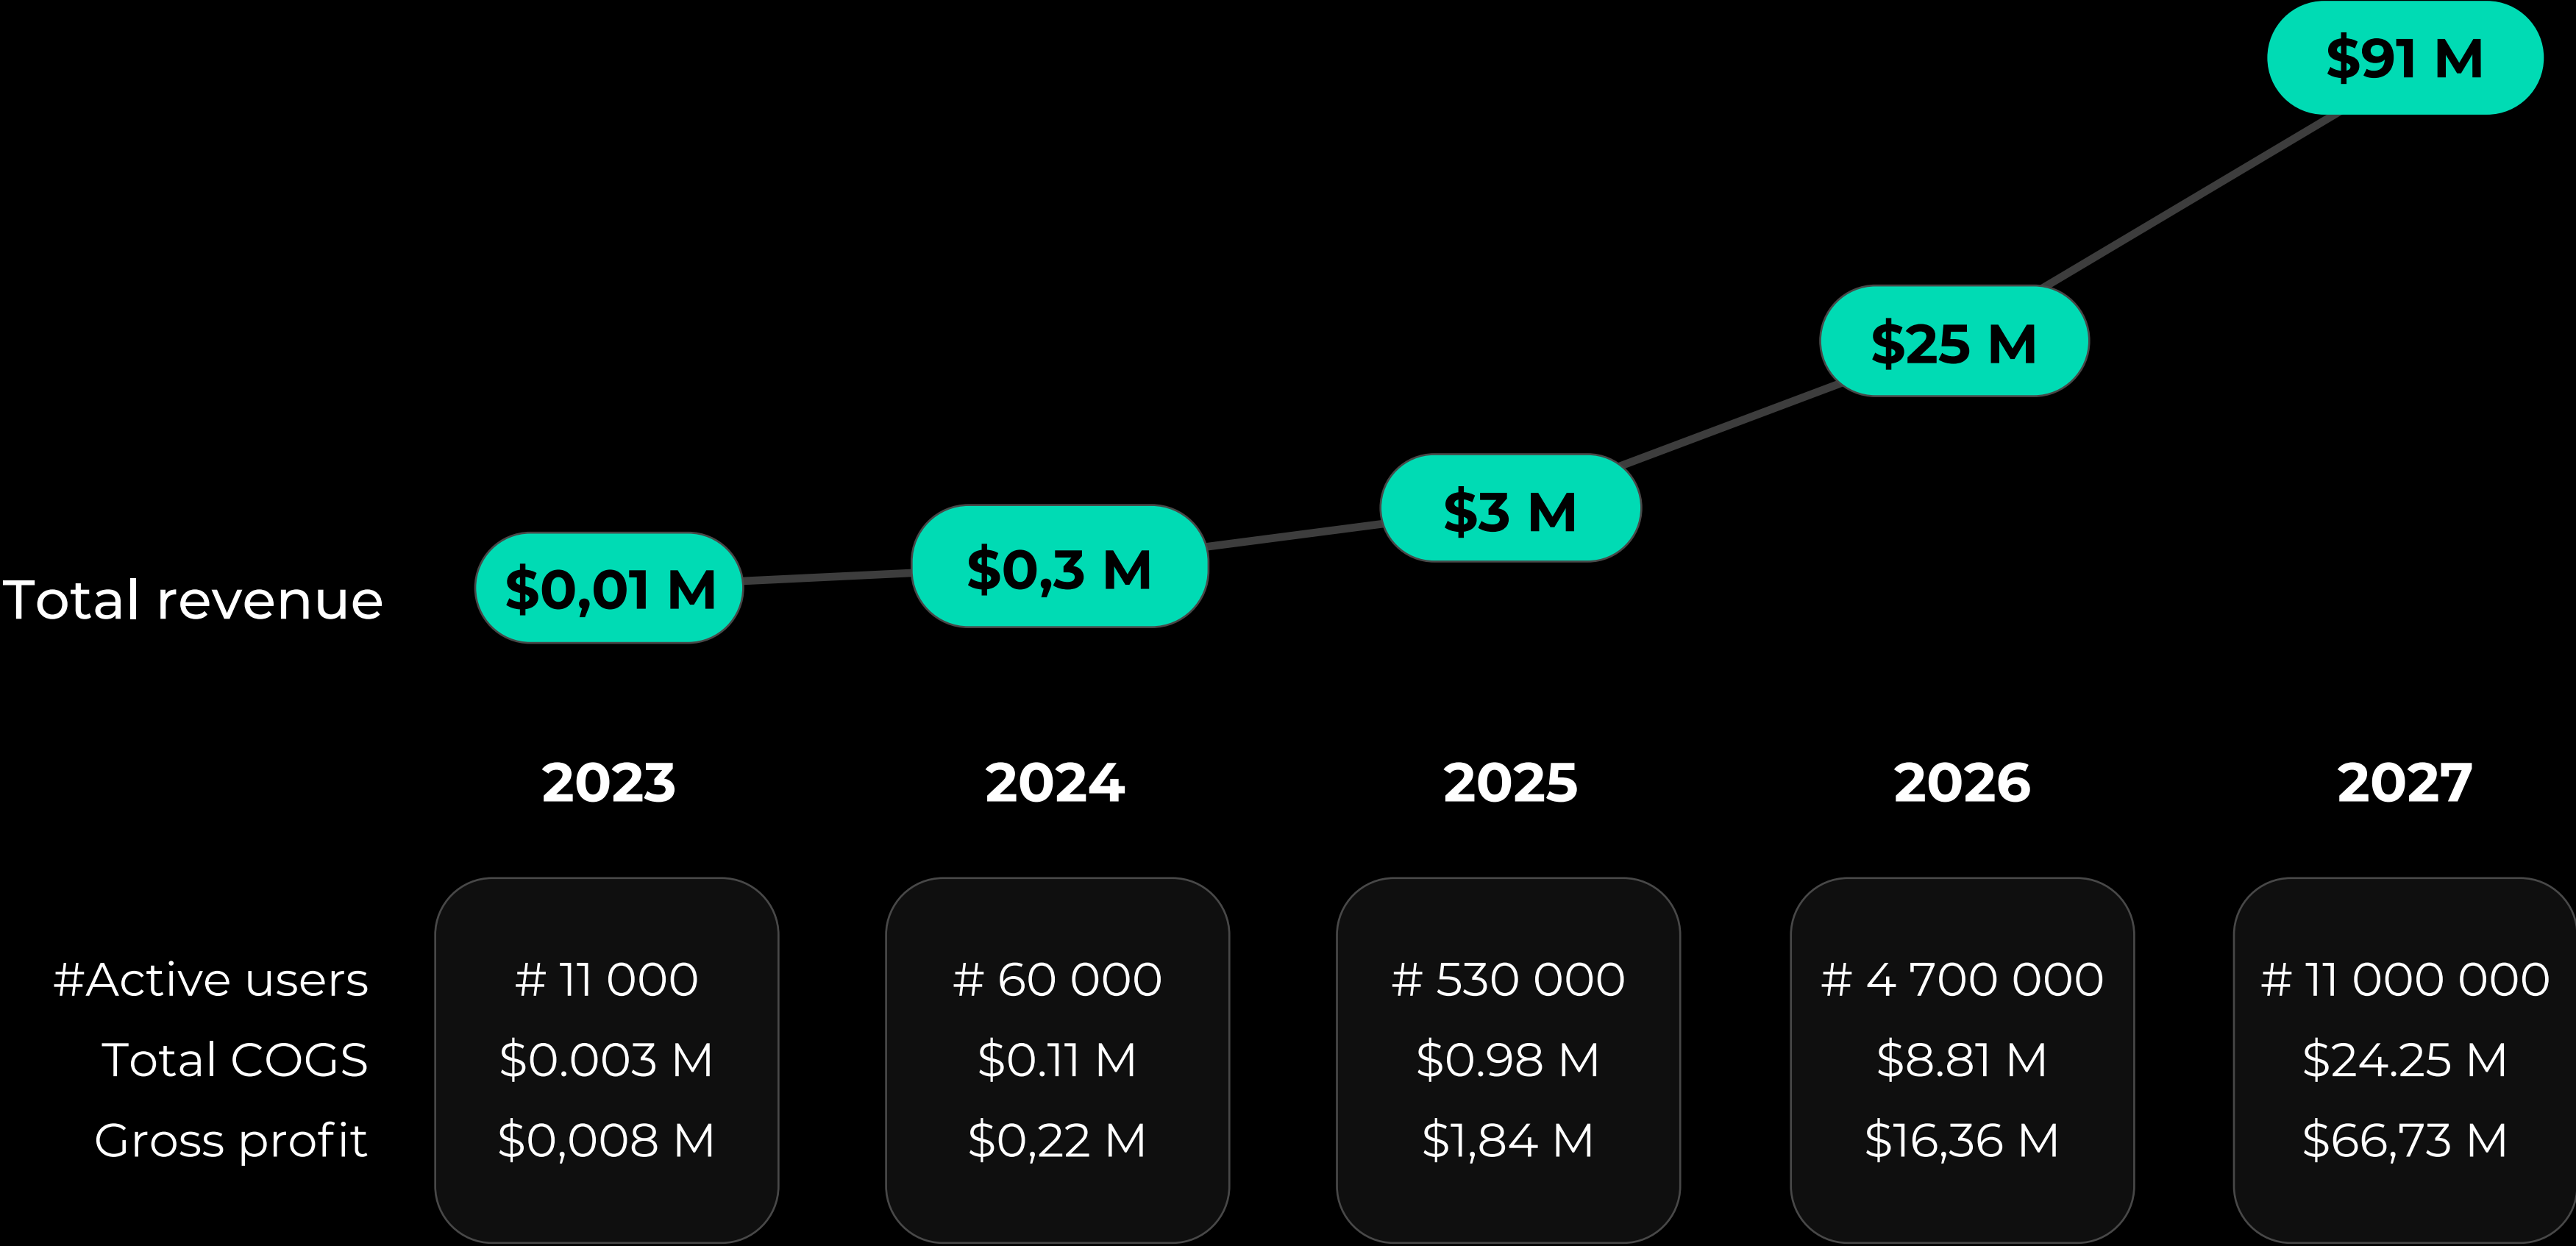

Coinbase, Amazon, Flipkart, Microsoft
and Twitter

Equity split: André (54%) Linn (46%) Jonas (3%) karan (1%) Antler (10%) (Adjusted for rounds)

Advisors: Arne Kvale (Solgt.no), Alex Haudeman (Datum), Anne Tutar (Antler), Navi Singh (Antler)

On-call experts: Evan M (Tumblr), Maria K (Uber), Vincent T (Klarna)
