"We enable people to conveniently manage passwords offline"

"For most users security and encryption is complete science fiction"

"A digital shelter, in an uncertain future landscape"

"Competitors compete on overlapping features,
we compete on being fundamentally different"

"Nothing has happened in passwords for the last 10-15 years"

"We are the choice you make when you want to lock down and stop worrying"

"The only brand in the world that truly has your back"

"Resilient ecosystems rely on decentralized autonomy"

"Individual security and privacy is key to prosperity"

«Managing passwords offline is the inevitable choice everyone will make»
